

## COVID-19 IgG/IgM Rapid Test

- Whole blood (Finger prick available), serum and plasma sample
- Easy to use - no analyser required
- Store at room temperature or refrigerator

The novel 2019 Coronavirus or “COVID-19” was confirmed and named by the World Health Organisation (WHO) in January 2020 when it was discovered in Wuhan, China.

On January 30th 2020 WHO designated the new Coronavirus infection epidemic as a public emergency of international concern.

The pneumonia caused by the novel coronavirus (SARS-CoV-2) is mainly transmitted through respiratory droplets. Typical symptoms of coronavirus include fever and a cough that may progress to a severe pneumonia causing shortness of breath and breathing difficulties. Coronavirus can cause more severe symptoms in people with weakened immune systems, older people, and those with long-term conditions like diabetes, cancer and chronic lung disease. Prestige Diagnostics UK are now offering a COVID-19 IgG/IgM Rapid Test offering high accuracy and quick results.

The COVID-19 Rapid Test Cassette has been compared with a commercial EIA test, the results indicating high specificity and sensitivity:

### IgG results:

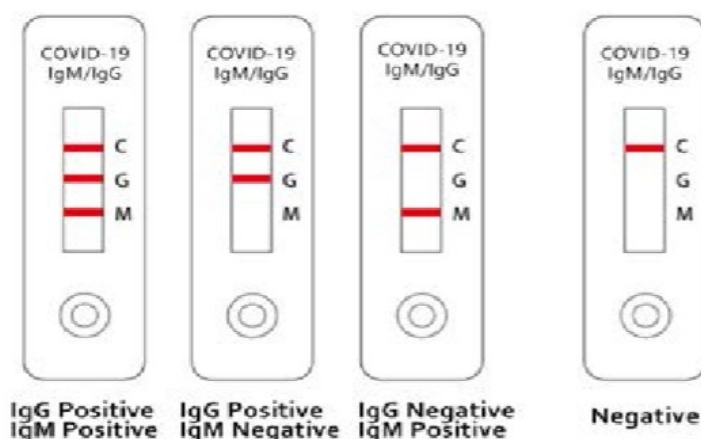

- Relative Sensitivity: 91.8%
- Relative Specificity: 96.4%
- Accuracy: 95.0%

### IgM results:

- Relative Sensitivity: 95.7%
- Relative Specificity: 97.3%
- Accuracy: 96.7%

Cat No.	Production Description	Pack Size
RADCOV1	10 Min RAPID Test Device	20 Tests
RADCOV2	10 Min RAPID Test Device with Lancet and Alcohol Swab	20 Tests
