Version 9

Prestige Diagnostics UK Ltd is a primary manufacturer of IVD Reagents based in The United Kingdom in the field of IVD Blood Grouping, Coagulation, Clinical Chemistry, Quality Controls & Calibrators, Febrile Antigens, Latex Serology, Syphilis, Elisa Assays, Rapid Tests and Urine Strips.

As an ISO13485:2016 accredited business we take all forms of quality assurance very seriously. We supply global-leading distributors across Europe, South East Asia, South America and most of Africa. Our existing partners appreciate our reputation for supplying consistently high-quality, certified products manufactured here in the United Kingdom.

Innovation being the key to any successful business, Prestige Diagnostics UK has constantly strived to be innovative in it's approach to the products and services it provides.

If you are a quality-driven IVD Diagnostic specialised distributor interested in creating new partnerships, Prestige Diagnostics would be interested in discussing with you distribution opportunities to support your regions IVD Clinical Diagnostic requirements.

H-20 HbA1C Analyser

The H-20 analyser is a fully automated HbA1c analyser designed for easy and reliable HbA1c measurements for the detection and management of diabetes. A sample taken from a finger prick or venous whole blood is required to measure glycated haemoglobin.

The H-20 is easy to operate and results are displayed on its clear, multi-lingual display. Training time is thus kept to a minimum allowing nurses and clinicians to concentrate on patient care. The H-20 delivers sample results within three minutes and are reported in IFCC and DCCT standards (Mono S & JDS reporting are also available). The H-20 HbA1c analyser can store up to 100,000 test results including Curve on the 2G TF Card which can be downloaded onto the PC via the integrated USB interface, PS-2 or Barcode. Alternatively, results can be printed using the built-in thermal printer.

AUTOTRON 420	Automated 300 tph Clinical Chemistry Analyser	1
TURBOCLOT	Fully Automated Coagulation Analyser	1
TURBOLYTE	Single channel coagulation analyser	1
HEMATRON 3 PLUS	3 part diff Hematology Analyser with Touch Control Screen	1
HEMATRON 5 PLUS	5 part diff Hematology Analyser	1
HEMATRON 5 PLUS Auto	5 part diff Auto Hematology Analyser (with auto-loader)	1
NEFLETRON	Specific Protein Analyser	1
FASTEP Hb	Strip based Hemoglobinometer	2
HEMONEU	Absorbance based Hemoglobinometer	5

PCR DUO: *Multiplex PCR Analyser*

The Prestige Diagnostics PCR Duo analyser is the new gold standard multiplex PCR analyser that has the capacity of testing up to 15 genetic targets per cartridge allows for a wide range of infectious disease panels, genetic markers, antibiotic resistance markers and companion diagnostic targets.

These Include:

STI's — CT/NG, CT/NG/MG, CT/NG/MG/MH, GBS, CT/NG/MG/TV

Respiratory — Flu A, Flu B, RSV, MPN, HRV, PIV, Adv, CoV, HMPV

Tuberculosis — MTB/ropB, MTB/MPN

Enterovirus — EV, EV71, CA16

Gastrointestinal — Campylobacter, C. difficile, P. shigelloides, Salmonella, Yersinia, Vibrio cholera, E. Coli, Adenovirus, Norovirus, Rotavirus A,

PCR6000 : *Nucleic Acid Detection Analyser*

The Prestige Diagnostics real-time fluorescence quantitative analyser offers a wide sample of applications with one-step RT q PCR results giving internal references throughout the complete experiment process.

MagXtractor 48:

Automatic Nucleic Acid Extractor

The Prestige Diagnostics MagXtractor automatic nucleic acid extraction system is based on the principle that the magnetic rod on the magnetic rod rack absorbs the magnetic beads and moves them to different reagent tanks. It can be used to extract nucleic acid and protein from various samples. It can operate 1-32-48 samples at the same time by adding detection samples and reagents to 96 deep hole plate. Compared with the traditional manual operation, the nucleic acid extraction process is simpler and automatic.

Microread: *Elisa Reader*

Microread is a microprocessor based Elisa reader for use with all types of Elisa assays.

Accommodates 96 well plates – U, V or flat bottom

Robust calculation modes to go along with different types of Elisa assays
– Absorbance, Cut Off, Standard, Point to Point, Mathematical models such as Linear regression, Exponent regression, Logarithmic regression and Percentage absorbance mode in Iti-point.

100 programming slots available for use

10,000 test records can be saved in the instrument software In built QC programme

Microwash: *Elisa Washer*

Microwash is a maintenance free Elisa washer for use with all types of Elisa assays.

8 or 12 channel wash head available.

Accommodates 96 well plates – U, V or Flat bottom

Very low residual volume of <0.5 ul per well

50 wash programmes storage

Programmable features to accommodate any type of washing requirement.

Phototron: *Semi automated Clinical Chemistry analyser*

Phototron is a microprocessor based semi-automated clinical chemistry analyser

Fully open system with End point, Kinetic, Two point and Bichromatic assay possibilities.

Flow cell and cuvette modes possible

Robust calibration modes: Standard with blank, sample blank, Linear & Non-linear curves

In built printer and in built QC programme

State of the art Windows operating system with USB mouse interface.

Lamp cut off to optimise lamp life

8 Wavelengths on board: 340, 405, 450, 500, 546, 578, 620, 670 nm

Turbolyte: Single Channel Coagulation analyser

Turbolyte is a turbodensitometric single channel coagulation analyser

One measurement channel, 4 heated cuvette positions and 1 heated Reagent position

Final Measurement volume 150ul to 300 ul

On board storage of 7 assays

PT, APTT, Fibrinogen and TT assays – Fully open system

Automated cuvette detection

9 point calibration curve – with storage.

Automated calculations of %, INR, g/l, mg/dl and Ratio

Autotron 120: Fully Automated Clinical Chemistry analyser

Autotron 120 is a windows driven fully automated analyser for small to medium sized laboratories or as a back up to main frame analysers.

Fully automated, Random access, discrete, patient orientated analyser.

Throughput of 100 tests per hour.

Totally open system with easy programming options for clinical chemistry and Immunturbidimetric assays.

Reduced reagent saving volume of 180ul to 500ul

Low sample volumes starting from 3ul to 45ul

8 wavelengths on board: 340, 405, 450, 510, 546, 600, 670 nm

In built QC programme

Pre heating of probe, collision protection and liquid level detection with on board diagnostics.

Autotron 240: Fully Automated Clinical Chemistry analyser

Autotron 240 is a windows driven medium sized fully automated analyser.

Fully automated, Random access, discrete, patient orientated analyser.

Throughput of up to 240 tests per hour.

Totally open system with easy programming options for clinical chemistry and Immunturbidimetric assays.

Automatic 8 step washing programme for cuvettes

Refrigerated compartment for reagents to enhance reagent life

8 wavelengths on board: 340, 405, 450, 510, 546, 600, 670 nm

Independent mixing probe to ensure homogeneity of reagent and sample mixture

Pre heating of probe, collision protection and liquid level detection with on board diagnostics.

Autotron 420: Fully Automated Clinical Chemistry analyser

The best-selling Autotron 420 Fully Automatic Clinical Analyser offers 360 Tests per hour, or up to 540 tests per hour with the optional ISE module. The Autotron 420 also offers a grating system that provides 12 wavelengths and a 8 step washing system with Bi-direction LIS Interface. An optional, built-in barcode reader can also be provided as part of your order specification. Prestige Diagnostics can provide tailor made reagents for this analyser. Other useful features provide pre-heating of probe, collision protection and liquid level detection with on board diagnostics.

Primary System Functions Automatic, Random Access STAT sample priority, available for all sample position barcode scanners for sample and reagent Bi-direction LIS interface (HL7) Throughput - 360 tests/hour (single and dual reagent). Up to 540 tests/hour with ISE (K⁺, Na⁺, Cl) Principle - Colorimetric, Turbidimetric Methodology - End-point, Two-point, Kinetic Discrepant Value Single/Dual/Triple/ Quadruple reagent chemistries Monochromatic / Bichromatic Programming - Open system with defined profiles and calculation assays.

Sample/Reagent Handling

2 Reagent probes, 1 sample probe

Sample tray - 100 positions

Reagent tray - 80 refrigerated positions

Refrigeration temperature - 2 - 10°C

Reagent volume - 20 - 350 µL, 1µL adjustable

R1 - 150 - 350 µl, 1µL adjustable

R2 - 20—250 µl, 1 µl adjustable

Support R3 and R4

Sample volume - 2 - 45 µl, 0.1 µl adjustable

Sample and Reagent probe -

Collision protection, liquid level detection and inventory checking.

Probe Cleaning - Automatic washing both interior and exterior, carryover <0.1% Pre-heating for reagent Auto -dilution - 3-150 times Built-in reagent/sample barcode reader (optional).

Reaction System

Reaction Positions - 100 cuvettes

Cuvette - Optional length 5mm

Reactional volume - 150 - 500µL

Reactional temperature - 37°C, ±0.1°C

2 mixing probes

8 steps Auto-washing system

Turboclot: *Fully automated Coagulation analyser*

Turboclot is a fully automated optical coagulation analyser for all types of coagulation assays.

- Clotting, Chromogenic, Immunologic measuring methods
- User-friendly Touchscreen Interface
- High throughput routine assays
- Labour saving, simple programming
- Reagent Open System, *closed system on request.*
- Reagents / Controls and Calibrators From Prestige Diagnostics
- Optional Multi-language software
- Throughput: 60 tests/hour for PT
- 50 tests/hour for PT and APTT
- Parameters: PT, APTT, TT, FIB, AT-1.11, PLG, D-Dimer, FDP, etc
- Measuring methods:
 - Clotting: Scattered Light Detection method
 - Chromogenic: Colorimetric method, 405nm
 - Immunologic: Turbidimetric method, 575nm
- Memory: 100,000 test results and 10,000 reaction curves
 - Quality control: 12 QC File"10 test items"30 curve* 12 month
 - Automatic, Random Access, STAT sample priority,
 - Auto re-diluent/ re-test
- Barcode-reading support (optional)

Nefletron: *Specific Protein Analyser*

Nefletron is an advanced Specific Protein Analyser for 30 commonly tested specific proteins.

- Single channel, 650nm laser based Advanced Nephelometric system for the quantitative measurement of Specific Proteins.
- No Calibration required. Calibration curve stored in an RFID card and provided per kit.
- Uses a simple two step operation for quantification.
- Can be used for the quantification of ASO, CRP, RF, HSCRIP, MICROALBUMIN, HBA1C, IGA, IGG, IGM, IGE, FDP, CYSTATIN C, FABP, AT III, TROPONIN I, LP(a), APO A1, APO B, APO E, NEFA, C3, C4, D-DIMER, NGAL, KAPPA LIGHT CHAINS, LAMBDA LIGHT CHAINS, CERULOPLASMIN among others.

Hematron 3 PLUS : *3-part, Intelligent Differential Haematology Analyser*

Hematron 3 Plus Intelligent, automated 3 part differential haematology analyser.

- Features and specification includes
- Automatic Tittle Sampling
- Simple Operation
- Low Consumption
- Multiple Reference Values (children and adult options)
- Manual and automatic calibration available. Fresh blood calibration available.
- Conforms to the demand of International standard Traceable Systems.
- Designed to use less reagents for testing reducing ongoing costs for the user
- Large quantity test results storage, at least 400 thousand test results with comprehensive information. Extended SD memory supported.
- Automatic & Intelligent diagnostic maintenance functionality.

Fastep Hb - *Strip-based Hemoglobinometer*

The Fastep Hb Strip-based Hemoglobinometer offers -

- Strip Based Haemoglobin Testing System
- Measures Hb and Calculated Hct
- 15 seconds to result
- 1000 results storage
- Easy battery operation
- Whole blood—EDTA / Heparin as samples
- Peripheral Blood sampling
- Tailor-made strips provided by Prestige Diagnostics

Hematron 5 PLUS: *5-part Differential Haematology Analyser*

The Hematron 5+ provides complete analysis including Reticulocytes through calculations of different angles via laser scatters and provides details of the cell size, complexity and granularity. The Hematron 5+ is a fast analyser with 60 seconds per sample with:

- an output of 28 parameters
- 2 histograms
- 2 scattergrams
- 2 3D stereograms

Hematron 5 PLUS AUTO:

Fully Automated 5-part Differential Haematology Analyser

Hematron 5+ Auto is a fully automated 5 part diff analyser models from Prestige Diagnostics. Being a fully automated analyser, all aspects including sampling, measurement and results output are automated. Results are available in less than a minute from placement in the test tube rack with 3D graphic data and results displayed on the LCD screen.-

System uses a semi-conductor laser for flow cytometry. - Automatic cleaning – inside and outside - LIS Connectivity - 200,000 samples storage capacity - Display: PC Display (14 inch), Bi-directional LIS and Barcode reading possibility - Automatic reagent residual alarm - Automatic diagnostics and maintenance - Comprehensive QC programme – LJ, X, XR, XB etc - 4 methods used simultaneously: Laser method for WBC differentiation, Electrical Impedance for RBC and PLT, Colorimetry for HGB and calculation method for calculated parameters.

Hematron 3 Plus Consumables

CAT NO.	DESCRIPTION	Pack Size	MOQ
HEMDIL1	HEMATRON 3 Diluent	20 Litres	5
HEMDET1	HEMATRON 3 Detergent	5 Litres	5
HEM1000	HEMATRON 3 Cleaner	100ml	5
HEMLYS1	HEMATRON 3 Lyse	1 Litre	5
HEMPMK1	HEMATRON 3 Preventative Maintenance Kit	2x50ml / 2x10ml	5
HEMPAP1	20x Rolls of 57mm Thermal Paper (57mm)	1 Box of 20	5

Hematron 5 Plus Consumables

CAT NO.	DESCRIPTION	Pack Size	MOQ
HEM5DIL	HEMATRON 5 Diluent	20 Litres	5
HEM5CLN	HEMATRON 5 Clean	20 Litres	5
HEM5STH	HEMATRON 5 Sheath	20 Litres	5
HEM5LYS	HEMATRON 5 Lyse	1 Litre	5
HEM5PCL	HEMATRON 5 Probe Cleaner	100 ml	5
HEM5RET	HEMATRON Reticulocyte stain tube	4 ml tube	5

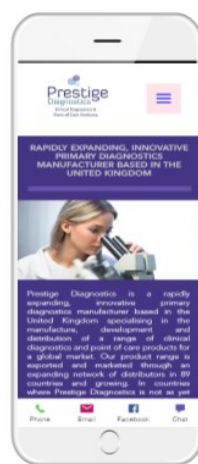

FastHb Hemometer Consumables

CAT NO.	DESCRIPTION	Pack Size	MOQ
HBMSTE1	FastHb Hemometer Strips	25T	10

PCR Duo Test Discs

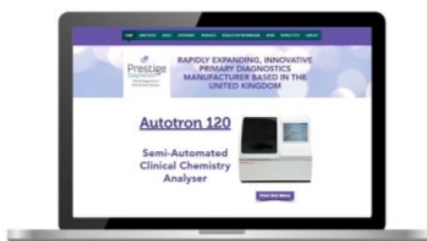

CAT NO.	DESCRIPTION	Pack Size	MOQ
PCRDSC1	PCR DUO Analyser Test Disc — COVID-19	1T	50
PCRDSC4	PCR DUO Analyser Test Disc — COVID-19/Influenza A/B and RSC	4T	50

CAT NO.	DESCRIPTION	Pack Size	MOQ
NEFASO2	Nefletron Antistreptolysin O (ASO)	25	10
NEFCRP1	Nefletron C-Reactive Protein (CRP)	25	10
NEFRF02	Nefletron Rheumatoid Factor (RF)	25	10
NEFMAU2	Nefletron Microalbumin (MAU)	25	10
NEFA1C1	Nefletron HbA1c	10	10
NEFA1C2	Nefletron HbA1c	25	10
NEFHSP2	Nefletron High Sensitivity CRP	25	10
NEFIGA2	Nefletron Immunoglobulin A (IgA)	25	10
NEFIGG2	Nefletron Immunoglobulin G (IgG)	25	10
NEFIGM2	Nefletron Immunoglobulin M (IgM)	25	10
NEFAPA2	Nefletron Apolipoprotein A1	25	10
NEFAPB2	Nefletron Apolipoprotein B	25	10
NEFC301	Nefletron Complement C3	25	10
NEFC402	Nefletron Complement C4	25	10
NEFDDM1	Nefletron D-Dimer	10	10
NEFDDM2	Nefletron D-Dimer	25	10
NEFCYS1	Nefletron Cystatin C	10	10
NEFCYS2	Nefletron Cystatin C	25	10
